

# TILE AND GROUT MAINTENANCE GUIDE

Here at R&S Cleaning, we know how intimidating cleaning your tile and grout can be, especially when you don't know where to start. However, regularly cleaning your tile and grout is the key to protecting the quality and keeping it looking radiant for years to come. Our guide is here to help you conquer those difficult stains and spills and provide go-to guidance for regular maintenance.

## GET STARTED WITH CLEANING YOUR TILE & GROUT:

### EVERY DAY

Everyday maintenance is a critical part of maintaining the quality of your tile and grout. When spills sit, they turn into stubborn stains, which are much harder to remove, costing you time and money to repair. Everyday maintenance is simple. Follow our tips below!

- make sure to wipe up spills with a damp cloth immediately
- after your shower, squeegee bathroom tiles and grout to remove excess water

### GROUT STAIN REMOVAL

#### Mild Stains

- **Step 1** - wipe down your tile
- **Step 2** - gently scrub the grout with a stiff brush and warm water to remove the stain

#### Tough Stains

- if there's still a stain after trying the steps above, let oxygen bleach for 15 minutes before washing it off with a stiff brush

### WEEKLY TILE MAINTENANCE

- **Step 1** - sweep your tile with a soft-bristled broom to remove any loose dirt on the surface
- **Step 2** - vacuum your tile with a brush attachment to protect the quality of the tile while picking up any loose dirt or debris missed while sweeping
- **Step 3** - scrub your tile with warm water to remove any stains and leave your tile looking fresh

#### Stubborn Stains

- **Step 1** - mix a solution of 1/2 white vinegar and 1/2 water
- **Step 2** - gently scrub the stain with a stiff brush once again
- **BONUS** - another great option for removing stains is scrubbing your grout with a stiff brush that has hydrogen peroxide
